BUSINESS UPDATE - Yes we are still OPEN

Coronavirus (COVID-19)

At Cashcor Engineering we are focused on the health and well-being of our people, customers and business. We are taking an informed approach that is balanced and guided by the expert medical advice of Australian Government authorities.

At present it is business as usual with no impact on our current capabilities.

One positive aspect of the Prime Minister's announcement last week was the Government's recognition that business must be allowed to continue to operate to support an economy weakened by the impact of this virus. It is a good time to support local industry and Australian jobs.

What Precautions We Are Taking:

- Maintaining good personal hygiene and regular hand washing.
- Alcohol based hand sanitiser to be used by both staff and customers.
 - Surfaces are being regularly disinfected throughout the day.
 - No physical contact with customers (e.g. Hand Shaking).
 - No more than 6 people in our office at one time.

What We Request Customers To Do:

- If you have been overseas or interstate in the last 14 days or in contact with a known case of COVID-19, please remain home and self-isolate for a minimum of 14 days. We are available via telephone to discuss work.
- If you become aware that you have been exposed to a case of COVID-19 and have since attended our business, please notify us as soon as possible.
- Only 6 people in the office area at one time. Please wait outside until you can meet this guideline.

Our commitment to service and supply to our customers remains unchanged and we are ready to assist with your requirements. If you would like any further information, please don't hesitate to contact our office on (07) 4035 1588 or via email cashcor@bigpond.net.au.

Yours sincerely

CASHCOR ENGINEERING
